

Kehan Pang

✉ pangkehan@buaa.edu.cn  github.com/KehanPang  Google Scholar

Ph.D. Student, School of Computer Science and Engineering, Beihang University

Education

Beihang University

Sep. 2022 – Apr. 2027 (Expected)

Ph.D. Student in Software Engineering, School of Computer Science and Engineering

Advisors: [Prof. Wenfei Fan](#) and [Associate Prof. Ping Lu](#)

Beijing University of Posts and Telecommunications

Sep. 2018 – Jul. 2022

B.Eng. in Computer Science and Technology

GPA: 3.7/4.0; Rank: 30/396 (Top 7.6%)

Work Experience

Meituan — Algorithm Research Intern

Sep. 2024 – Jan. 2025

Core Local Commerce / M17

- Evaluated and cleaned web data for foundation-model pre-training, with an emphasis on data quality assessment.
- Deployed a local 7B model and conducted full-parameter fine-tuning for the web-cleaning task.
- The fine-tuned model reached approximately 96% of the GPT-4 baseline ROUGE-L on that task.

Research Experience

Beihang University — Doctoral Research

Sep. 2022 – Present

- Conduct research in graph data mining and large language models, with particular interests in graph data quality, graph neural networks, and data-centric AI.

Shenzhen Institute of Computing Sciences — Research Intern

Jul. 2023 – Jan. 2024

- Worked on graph data management, graph enhancement, GNN interpretability, graph computing, and low-resource LLM adaptation.

Awards and Academic Service

- First Prize, Beijing Undergraduate Mathematics Competition, 2019 and 2020.
- First Prize, Chinese Mathematics Competitions, 2019 and 2020.
- Undergraduate Scholarship, Beijing University of Posts and Telecommunications, 2019–2021.
- Academic Scholarship, School of Computer Science, Beihang University, 2022–2025.
- Honorable Mention, Mathematical Contest in Modeling, 2020.
- Beijing municipal-level Undergraduate Innovation and Entrepreneurship Training Program award, 2020.
- External Reviewer, IEEE International Conference on Data Engineering (ICDE), 2024–2026.
- Patent application: *A Method, Apparatus, Device, and Medium for Graph Data Augmentation*, Chinese invention patent application, 2025.

Research and Technical Expertise

- **Research areas:** Graph Data Mining; Large Language Models.
- **Research topics:** Graph data quality, graph neural networks, GNN interpretability, graph computing, and data-centric AI.
- **Applied experience:**
Web-data cleaning and quality evaluation, full-parameter LLM fine-tuning, and low-resource LLM adaptation.
