

Kehan Pang

庞可涵

Ph.D. Student, School of Computer Science and Engineering, Beihang University
pangkehan@buaa.edu.cn github.com/KehanPang Google Scholar

Research Interests

Graph Data Mining; Large Language Models. Particular interests include graph data quality, graph neural networks, and data-centric AI.

Education

Beihang University

Ph.D. Student in Software Engineering, School of Computer Science and Engineering
Advisors: Prof. Wenfei Fan and Associate Prof. Ping Lu

Sep. 2022 – Apr. 2027 (Expected)

Beijing University of Posts and Telecommunications

B.Eng. in Computer Science and Technology
GPA: 3.7/4.0; Rank: 30/396 (Top 7.6%)

Sep. 2018 – Jul. 2022

Manuscripts

- Wenfei Fan, **Kehan Pang**, and Dandan Lin. **OpenMind: Query-Time Diversification via Logical Rules**. Under Revision.
- Kehan Pang** and Dandan Lin. **ComCE: Community-Aware Counterfactual Explanations for Graph Neural Network**. Under Review.

Research and Industry Experience

Meituan — Algorithm Research Intern, Core Local Commerce / M17

Sep. 2024 – Jan. 2025

- Evaluated and cleaned web data for foundation-model pre-training; deployed and fully fine-tuned a local 7B model.
- The fine-tuned model reached approximately 96% of the GPT-4 baseline ROUGE-L on the web-cleaning task.

Shenzhen Institute of Computing Sciences — Research Intern

Jul. 2023 – Jan. 2024

- Worked on graph data management and enhancement, GNN interpretability, graph computing, and low-resource LLM adaptation.

Honors and Awards

- First Prize, Beijing Undergraduate Mathematics Competition, 2019 and 2020.
- First Prize, Chinese Mathematics Competitions, 2019 and 2020.
- Undergraduate Scholarship, Beijing University of Posts and Telecommunications, 2019–2021.
- Academic Scholarship, School of Computer Science, Beihang University, 2022–2025.
- Honorable Mention, Mathematical Contest in Modeling, 2020.
- Beijing municipal-level Undergraduate Innovation and Entrepreneurship Training Program award, 2020.

Academic Service and Patent
